

Press Release: Amster Rothstein & Ebenstein Promotes Brian Amos to Senior Counsel

January 7, 2020 (New York) – Amster Rothstein & Ebenstein, a full-service intellectual property law firm, is pleased to announce the promotion of [Brian Amos, Ph.D.](#) to senior counsel.

A former research neuroscientist who represents universities, research institutions and corporations in the preparation and prosecution of patent applications worldwide, predominantly in the fields of biotechnology, medical therapeutics and pharmaceuticals, Brian works closely with scientists, in-house counsel and Technology Transfer Offices to identify and inventory new patentable technologies; protect discoveries through patents; and commercialize intellectual property through licensing and development arrangements with other business entities.

Brian's specific areas of patent procurement experience include artificial intelligence-based technologies, diagnostic technologies, antibodies and fusion proteins, engineered immune therapeutics and targeted therapies, immune checkpoint interventions, recombinant live vaccines, vaccine enhancers, cancer therapies, nucleic acid sequencing technologies, siRNAs, antisense oligonucleotides, stem cell-based therapies, cardiac treatments, neurological treatments, cellular delivery agents, nucleic acid-based nanotechnologies, small molecules, pharmaceutical formulations, complete syntheses of natural products, EEG-based methods and medical devices.

Brian has published articles in Nature Biotechnology and for Oxford University Press on patent law issues and has been a webinar presenter to Tech Transfer professionals and other attorneys on subjects such as patentable subject matter in diagnostics and Bayh-Dole Act compliance.

"Brian's promotion reflects our firm's dynamic growth as we continue to expand in practice areas crucial to our clients. We are confident that Brian will continue to make important contributions to our clients in the years ahead," said Managing Partner [Anthony Lo Cicero](#).
