

Amster Rothstein & Ebenstein Recognized as a Leading Law Firm by the 2021 WTR 1000 and Max Vern Recognized as Top Lawyer

WTR 1000

Amster Rothstein & Ebenstein was once again recognized as a leading firm by the 2021 World Trademark Review WTR 1000, the global leading resource for legal trademark expertise.

The firm was described by the WTR as "demonstrating great agility, commitment and rock-solid IP fundamentals" and providing "first-rate and contemporary brands service to US and global clients, which reward it with enduring loyalty."

We are proud to announce that partner Max Vern has moved up to the Top "Gold" Tier in the Prosecution and Strategy category.

The WTR noted that Max, "understands business and gives sensible advice in alignment with clients' wider commercial objectives. He is brilliant at explaining complicated IP issues to non-lawyers and is incredibly responsive, communicative, proactive and creative. He is always cognizant about costs, too, and delivers his advice in the most efficient manner." He has created a strong narrative for the team during the review period by expanding trademark counselling and prosecution activities in fields such as cryptocurrency and pharmaceuticals, and by obtaining impressive court victories."
